The palette, as a ColorScheme

Role	Hex	Used for
primary	#A78BFA	Main buttons, active states
onPrimary	#0F1117	Text and icons on primary
secondary	#5D5491	Highlights, secondary actions
surface	#1E2130	Cards, sheets, dialogs
onSurface	#FFFFFF	Body text
error	#F87171	Validation and destructive actions

Contrast: The contrast check confirmed that the tested text/background combinations meet WCAG AA.

Dark mode: Yes. Drift will use a dark color scheme because its cozy, nighttime lo-fi atmosphere is part of the app's visual design.

The type scale, as a TextTheme

Your style	Flutter slot	Size	Weight	Used for
Heading	headlineSmall	24 px	Bold	Screen titles
Body	bodyMedium	14 px	Regular	Normal text
Caption	labelSmall	12 px	Regular	Timestamps, hints

```
textTheme: TextTheme(  
  headlineSmall:  
    GoogleFonts.nunito( fontSize: 24,  
      fontWeight: FontWeight.bold, ),  
  bodyMedium:  
    GoogleFonts.dmSans( fontSize: 14,  
), labelSmall: GoogleFonts.dmSans(  
  fontSize: 12, ), ),
```

```
  style:  
Theme.of(context).textTheme.head  
lineSmall
```

Spacing, as constants

```
class AppSpacing {  
  static const double xs = 4;  
  static const double sm = 8;  
  static const double md = 16;  
  static const double lg = 24;  
}
```

Components

Component	File	Constructor parameters	Appears on
Buttons	app_button.dart	label, onPressed, type	Home, To-do
Sliders	app_slider.dart	value, onChanged, min, max	Sound Mixer
Icons	app_icon.dart	icon, size, color	All screens
To-do List Row	todo_list_row.dart	text, done, onChanged	To-do
Track State	track_state.dart	title, isPlaying, onPlay, onNext, onPrevious	Music

What changed, and why

Element	Prelim said	Now says	Why it changed
Palette	Hand-picked colors for Drift's dark visual style.	Colors are assigned to Flutter ColorScheme roles, with on colors and a contrast check.	Building the app showed that colors need clear roles when translated into Flutter, and the contrast check confirmed that the palette is readable.
Type scale	Heading: Nunito Bold 24 px; Body: DM Sans Regular 14 px; Caption: DM Sans Regular 12 px.	The same typography is retained and mapped to Flutter TextTheme slots.	M4A4 and M5A5 confirmed that the existing type choices fit the app, so they were kept while making their Flutter roles explicit.
Spacing	Spacing values were defined visually in the original design system.	Spacing now uses 4, 8, 16, and 24 px tokens, with 16 px screen padding, 8 px list-item gaps, and 24 px section gaps.	The revision makes spacing decisions more consistent and easier to apply while building the app.
Components	Components were shown visually and named: Buttons, Sliders, Icons, To-do List Row, and Track State.	Each component now has an intended file location, constructor parameters, and the screens where it appears.	M4A4/M5A5 showed how reusable UI pieces need clearer implementation details when moving from a visual design to Flutter.
